

Privacy Policy

General Information

The Motivated Memory Laboratory, led by Dr. R. Alison Adcock, MD, PhD within the Center for Cognitive Neuroscience at Duke University is conducting a research study to see how the brain works during motivation, learning, and reward tasks in individuals who smoke cigarettes. This privacy policy describes what information we collect, how we use it, whom we share it with, and your control over it.

Information we collect

We collect only the information you provide us with.

In order to determine study eligibility, you must answer several questions in a questionnaire to help us determine if you may potentially qualify to be in this study. These questions will take about 5-10 minutes to complete. A member of the study team will then review your responses and will let you know of the next steps via email or phone call. You may also email us at adcocklab.rtnic01@duke.edu or give us a call us at 919-681-4601 if you prefer to talk to a study team member directly.

How We Use Information

We use this information only to determine your eligibility to participate in the study.

Participation

Answering these questions is voluntary. You are under no obligation to answer them, and not answering them will have no effects on your health care at Duke. Not answering the questions, however, means that you will not be eligible to participate in this research study.

How We Store Information

All the data is kept on a secure server and only staff members associated with the lab have access to the data. While we do our best to protect your information, there is always a risk of breach of confidentiality. If you at any time during this prescreening, you would like to stop and not participate you may simply close your browser.

How We Share Information

Your information will not be shared with any other party.

If you qualify for the study and choose to participate your information will be de-identified and kept on a secure server and/or in a locked cabinet within a locked room in the Center for Cognitive Neuroscience at Duke University, Durham NC.

If you do not qualify, your information will be erased/destroyed.

Control Over Your Information

Your participation is completely voluntary. If you at any time during this prescreening, you would like to stop and not participate you may simply close your browser. If you enroll in the study, you may choose to withdrawal from the study at any time.

If you have any questions, please contact us at adcocklab.rtnic01@duke.edu or give us a call us at 919-681-4601.
